

Three ways to put their drawing on a cup.

Pick one together. Then use the prompt in ChatGPT with Astra to make the file.

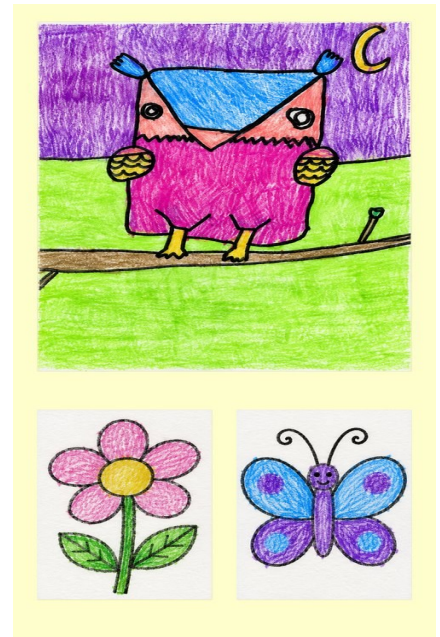

01 One big drawing

Keep the whole scene, scribbles and all.

02 Repeat it

Just the owl, spaced out, on the drawing's own green.

03 A few together

Three favorites, or one from each child.

Photo tip

Lay the drawing flat and shoot from straight above in bright, even light, or use a scan. Get the whole drawing in the picture, right to the edges. Astra does the rest.

What stays

The wobbly lines, the pencil texture and their color choices. We arrange the art; we never redraw it.

Then

Paste the prompt into ChatGPT with Astra, attach your photo, download the finished PNG, and upload it at wrapware.com/products/design-your-own. Preview the cup, then order.
